

Confined Space Entry Training

Language Available:

- English
- Spanish

Student Count (per class):

- Min = 1
- Max = 15

Course Duration:

- 7.5 Hours

Course Materials:

- Booklet
- Quiz

Virtual Training:

- Optional

Course Overview

The goal of this training course is to keep workers safe while entering a Confined Space. Confined spaces may be encountered in virtually any occupation; therefore, their recognition is the first step in preventing fatalities. Confined space training outlines the skills and protocols for safe entry to confined spaces and includes precautions such as locking and tagging out connecting piping, testing of breathable air quality, forced ventilation, observation of workers in the space, and a predetermined rescue plan with appropriate safety harnesses and other rescue equipment standing by.

Discussion Topics:

- Characteristics of Confined Spaces
- Hazards of Confined Spaces
- Requirements for Permit Required entries
- Atmospheric monitoring
- Confined Space Ventilation
- Isolation of Hazards
- Recognizing signs & symptoms of exposure
- Duties of Authorized Entrant, Attendant & Supervisor
- Emergency Procedures
